Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Part III DETAILED ACTION

Notice to Applicant(s)

1. This application has been examined. Claims 1-15 are pending.

Information Disclosure Statement

2. The references listed in the Information Disclosure Statement dated 7/26/01 have been considered by the Examiner and is attached to this Office Action.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 14 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Noguchi (U.S. 6,290,322).

Art Unit: 2626

With respect to claim 14, Noguchi discloses a method of operating a computer (20) controlled printing system (column 7, lines 29-32) including steps of installing a toner in a connected printer (column 4, lines 49-63) storing data corresponding to said toner in said printer (column 4, lines 19-32), and communicating said data corresponding to the toner to a supporting processor through a dedicated processor for routing data to said printer (column 7, lines 29-32).

With respect to claim 15, Noguchi discloses setting a switch (column 6, lines 64-66).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noguchi et al (Noguchi) (U.S. 6,290,322) in view of Kusumoto (U.S. 4,958,192).

With respect to claims 1, 3, 5, 8, 9, and 11, Noguchi discloses a printer capable of having any of a plurality of toners installed in a print engine (column 4, lines 49-63), the printer including a switch (which reads on means for selecting an operation mode of the printer) (column 3, lines 33-40 and column 6, lines 64-66), settable to a state corresponding to a particular toner (column 3, lines 33-40), and a communication path (16) connectable to a feedback link extending from said printer to a supporting data processor (20, figure 1).

Art Unit: 2626

Noguchi differs from claims 1, 3, 5, 8, 9 and 11 in that he does not clearly disclose a developer. Kusumoto discloses an image forming apparatus comprising plural changeable developing units (column 4, lines 17-20) which may be enabled or disabled by a switch (designating) (column 5, lines 51-59) and means for selecting a particular developing unit based on the needs of the user (column 5, lines 51-59 and the abstract). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Noguchi to include a developer. It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Noguchi by the teaching of Kusumoto in order to increase user efficiency.

With regard to claim 2, Noguchi discloses an AFCCU (which reads on the CPU) (11, figure 1).

With respect to claims 4 and 10, Noguchi discloses enabling or disabling the toner in accordance with the setting of the switch (column 7, lines 2-9).

With respect to claims 6, 7, 12, and 13, Noguchi discloses limiting user access to the switch (the switch can only be selected from the operating panel or the computer) (column 3, lines 33-40 and column 7, lines 28-32).

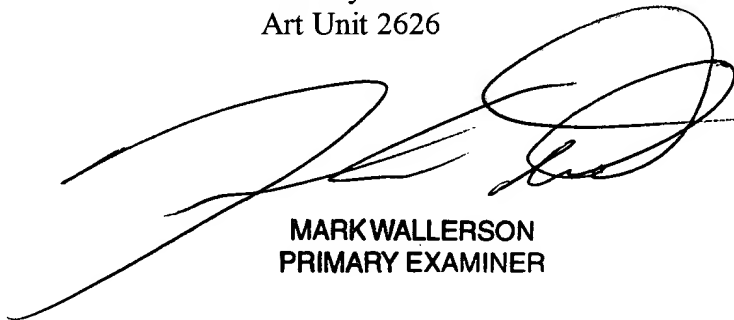

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark E. Wallerson whose telephone number is (571) 272-7470. The examiner can normally be reached on Monday-Friday - 6:30-4:00.
